**Subject:** Evaluation of CES responses to RAI 3  
**Attachments:** Cadmus evaluation of CES responses to RAI 3 (modeling and operations).docx

Hi Calvin, and happy new year.

Attached is Cadmus' evaluation of CES's responses to our technical questions on operating conditions and AoR modeling. We have only a few follow-up questions given that the AoR modeling will be substantially updated after CES gathers site specific information as they drill the well and perform formation testing.

However, for the most part, we believe that the modeling approach is in good shape to be updated when this information becomes available.

Please let me know if you have any questions or would like to discuss this evaluation.

We are working on evaluating the responses to RAI#4 (testing and monitoring and well construction and plugging). We will provide these later this month.
